- ✓ High battery capacity – Li-ion battery
- ✓ 2.5mm jack for headset
- ✓ Loudspeaking and handsfree function
- ✓ Battery and belt clip included
- ✓ Personalized softkey
- ✓ 10 last alarms are stored in the handset, up to 32 characters in each message

The Rough DECT Handset is a robust, well designed and full-feature handset. It meets demands for easy mobility and is built for long-term dependability in harsh environments. In order to meet special requirements, the handset is IP-65 classified, meaning that it is dust tight and water resistant. The handset has a very high battery capacity with speech/standby time up to 16/150 hours. The handset is easy to use with a large backlit color display. The display provides calling information (calling number presentation) as well as phone book, call history, and phone setting.

To improve communication in noisy environments, the DECT handset has a headset jack for an active industrial headset and vibrator option, making the handset ideal for environments where a ringtone may not be loud enough to detect incoming calls and messages. Optionally an office type headset can be used to provide hands-free operation in other environments. A wide set of accessories can be provided for comfortable wear and phone usage such as charger, belt clip, leather poach handle. Each DECT phone requires a SIP user license in the Vingtor-Stentofon ACM system.

# Specifications
