Description

The TMIS-4 IP Turbine Mini intercom station is robust and designed for indoor use. This station is typically used as a communication, information or emergency point and connects directly to the IP network. This makes it easy to deploy anywhere and at any distance.

All IP stations in the Turbine series utilize the latest technology to create unparalleled audio quality. Some of the many features include: HD voice quality, Open Duplex, Active Noise Cancellation, MEMS microphone, and a Class D amplifier.

These features, in conjunction with our many decades-long experience with acoustic technology are only a few of the many factors that contribute to the superior audio quality of our products.
