Description

Managed industrial ethernet switch, designed to provide ASL's safety critical Secure Loop network for medium to large installations.

The NETWORK-SWITCH-LP01 is a Managed Industrial Switch specifically designed to suit heavy industrial environments and contains all the standard features to deploy in an EN 54 Voice Alarm system. Engineered with hardened components and enclosed in a rugged IP30 aluminium case, the NETWORK-SWITCH-LP01 can operate in a wide temperature range and also has excellent tolerance capability to high vibration and shock. The switch is also equipped with a variety of management functions that let you configure communication parameters as you desire, and can monitor the network behaviour in number of different simple ways. In addition, the switch is built with dual redundant power inputs to ensure reliability and maximize network up time whilst ensuring full compliance with EN 54-16.
