- ✓ COMPATIBLE WITH iVENCs CORE

Public Address Control Room Solutions

Description

The iVENCs Display Systems module is a comprehensive application that allows for the simultaneous and coordinated management of both the audible PA system and visual displays.

With this module, users can access all of the features of the iVENCs Public Address module for both audible broadcasts and integrated visual displays. This includes live speeches and flexible text messaging, pre-recorded PA messages and associated text display messages, immediate operator announcements, scheduled automated announcements, and multilingual messaging capabilities.

In addition, the display systems module enables automated train or flight PA broadcasts to be linked with the corresponding train or flight information displayed on Passenger Information Displays.
