## 5 Privacy settings, all stations

### Permanent Private Mode

The station should be set in permanent private mode by setting an internal strap S9 to the Private (PRIV) position. When the internal strap is set to the Private (PRIV) position, the station will still ring for incoming calls.

The internal strap is accessible from the top of the PCB No.6974/2. To set the internal switch to Private:

1. Default setting is OPEN
2. Move and set the strap in PRIV position
