

Tamper Switch for IP Vandal Resistant Substation TKIE Installation Guide

The tamper switch is an accessory that adds tamper detection functionality to the Vandal Resistant IP Substation TKIE (1008041200).

Item Number	Item Description
1008091010	Tamper Switch for Vandal Resistant IP Substation TKIE, including spacers, wires

The following procedure assumes that you have already opened the substation, exposing the TKIE board.

To install the tamper switch:

1 Remove the two nylon nuts on the TKIE board as indicated

2 Attach the supplied spacers

3 Mount the tamper switch on top of the spacers and secure with the nylon nuts

4 Remove the button GND wire from the TKIE board

5 Insert the button GND wire into the connector on the tamper switch as shown

6 Use the supplied wires to connect GND and GPIO as shown
