IP Desk Master with handset-V2 Release

Zenitel is happy to announce the release of the first device in our updated IP master station range, the IP Desk Master with handset-V2.

Main Features

The new station looks and operates in the same way as the station it replaces. But an important functional enhancement is that it is now possible to use it as the Edge Controller in an IC-EDGE system.

Further enhancements are:

- Secure boot: only software which has been signed by Zenitel is able to run on the device
- 2 software partitions: like TCIV+ and ICX-500, upgrading the software causes much less downtime. The station remains operational while the software is upgraded, downtime is only during the rebooting of the station after the upgrade
- When using the web interface, it is very easy to upgrade the software. Simply drag and drop the new software in the appropriate box on your screen
- Faster reboot time

Product references

The new station can be ordered using the following item number

- 1008401000 IPDMH-V2 IP Desk Master with handset-V2

This station replaces the now obsolete

- 1008001000 IP Desk/Wall Master Station, Display and Handset

Your Feedback

If you have any questions related to this bulletin, please contact your local Zenitel sales representative. We look forward to further developing our cooperation during the remainder of 2020 and in 2021 and are grateful for your continued business and support.
