- 1008472220 IP Heavy Duty Telephone, Door, No Keys, CoiledRubber cord, Yellow

Release of the new stations is expected during Q4 2021.

Main Features

The new stations look and operate in the same way as those they replace, but with some key functional enhancements. It will be possible to use these stations as the Edge Controller in an IC-EDGE system.

Further enhancements are:

- Secure boot: only software that has been signed by Zenitel is able to run on the device.
- 2 software partitions: like TCIV+ and ICX-500, upgrading the software causes much less downtime. The station remains operational while the software is upgraded, and downtime is only during the rebooting of the station after the upgrade.
- When using the web interface, it is very easy to upgrade the software. Simply drag and drop the new software in the appropriate box on your screen.
- Faster reboot time.

Your Feedback

If you have any questions related to this bulletin, please contact your local Zenitel sales representative. We look forward to further developing our cooperation in 2021 and are grateful for your continued business and support.
