RELEASE BULLETIN

ICX-AlphaCom 1.2.3.4 Software Release

To : All Zenitel Offices & Partners   March 09. 2022

Release of ICX-AlphaCom 1.2.3.4

Zenitel is pleased to announce the release of ICX-AlphaCom software package 1.2.3.4. This software is available for both the ICX-500 and x64 based servers.

Cyber Security

Zenitel uses Nessus and OpenVAS to scan its software for cyber security vulnerabilities before the software is released. When installing ICX-AlphaCom, please use the guidelines as detailed in the document 'CyberSecurity Hardening Guide' which is available on zenitel.com.

Bug Fixes

Some bugs have been fixed in ICX-AlphaCom 1.2.3.4

For details on all changes in this and previous releases, please see the 'Release Notes' section on Zenitel Wiki: https://wiki.zenitel.com/wiki/Category:Release_notes.

Availability

ICX-AlphaCom 1.2.3.4 is now available on Zenitel Wiki. You can find additional resources and download the software at: https://wiki.zenitel.com/wiki/Downloads.

As software updates may be made available at any moment, it is always advisable to check for the latest available version on a regular basis. To be able to download software it is required to log in with a username and password. These can be obtained by sending an e-mail to alphasupport@zenitel.com. Please make sure that we can identify from the mail who you are.

Your Feedback

If you have any questions related to this bulletin, please contact your local Zenitel sales representative. We look forward to further developing our cooperation in 2022 and are grateful for your continued business and support.
