NEW VINGTOR STENTOFON SPEAKERS AND IMPROVED DESIGN OF CL-200T

Dear all,

We are now introducing an extended range of Vingtor Stentofon loudspeakers with new ceiling and bathroom speakers, new volume controllers and an improved design of the CL-200T.

CL-200T improved back box design

We have updated the design of the back box for the CL-200T ceiling speaker with metal fire dome.

In the updated design, the cable glands are placed on the side rather than on the top of the back box. This design change significantly reduces the required mounting depth of the speaker, especially when using thick industrial or marine grade cables. The change should make the CL-200T suitable for an even wider range of projects and applications.

Required mounting depth CL-200T:

Current version (item no 2131000100): 150-160 mm
New design (item no 2131000138): 100 mm

CL-200T with the improved design will be in stock from end of the year 2017 and it will replace the current version of the speaker. At this time, all remaining orders for item no. 2131000100 will be converted to item no 2131000138.

New VS speakers CLMQ-200T and CL-135T are now in stock

Two new Vingtor Stentofon ceiling speakers are now available from stock.

CLMQ-200T 6" Ceiling speaker, high sound quality

The CLMQ-200T is a ceiling speaker that has a nice, flat frequency response curve and can deliver great audio quality suitable for background music and highly intelligible voice messages.

More information and specifications can be found here:

<https://www.zenitel.com/product/clmq-200t>

New design of CL-200T back box with cable glands on the side.

CLMQ-200T

CL-135T 5" miniature 6W ceiling speaker

The CL-135T is a miniature ceiling speaker with good audio characteristics despite the compact design. The speaker is especially suited for small rooms or where space for mounting speakers is limited.

More information and specifications can be found here:

<https://www.zenitel.com/product/cl-135t>

CL-135T

New VS bathroom speakers

We are also introducing two new speakers for bathrooms and humid rooms, one for on-wall and one for ceiling mounting. These speakers will be available from stock from the beginning of 2018.

CLWT-135T Ceiling speaker WT, 100V, IP54, 10W

The CLWT-135T is a ceiling speaker intended for bathrooms and humid rooms with a watertight back box ensuring an IP rating of IP54 from all sides. Despite the compact size, the CLWT-135T has power tapplings ranging from 2,5 to 10W in order to cover both small and larger rooms.

More information and specifications can be found here:

<https://www.zenitel.com/product/clwt-135t>

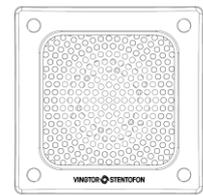

CLWT-135T

BSWT-6T On-wall speaker, 100V, IP65, 6W

The BSWT-6T is an on-wall speaker intended for bathrooms and humid rooms with an IP rating of IP65 from all sides. The speaker has cable entries from the bottom or from the rear. An integrated gasket enables watertight mounting without cable glands when using the rear cable entry.

More information and specifications can be found here:

BSWT-6TF (product image to come)

Volume Controllers

With the VCOR-XX series we are introducing a new line of volume controllers that can easily be integrated with standard Gira, Jung and Euro solutions. The volume controllers have a design that fits well into accomodation and public areas and comes in 15 and 60W version with either standard or fail safe override relay. These volume controllers will replace the existing models VM15-R (3005010210) and VM50-R (3005010213) which will be phased out at the same time. The dual volume controllers VM15-RD and -RDF and VM50-RD and -RDF will remain unchanged.

More information and specifications can be found here:
