

## VAF-1 Handset Replacement Guide

Item Number	Item Name	Description
2213000300	VAF-1	Analog Flush Telephone w/Relay
2213000310	VAF-1-HS	VAF-1 handset. Complete spare part

### 1 VAF-1 Overview

### 2 Replace the Handset

To demount the old handset:

1. Remove the four screws that attach the VAF-1 panel to the console.
2. Remove handset cable from PCB by unplugging K2
3. Press strain relief bushing from back to front to release handset cable.
4. Pull the cable with plug out through the hole
5. Keep/Reuse the strain relief bushing for the new handset

To mount the new handset:

6. Wrap the strain relief bushing around the cable and pull the cable through the hole
7. Length between bushing and plug must be long enough to be able to connect to K2 handset contact.
8. Press strain relief bushing into panel from front to back.
9. Plug in handset cable to K2 handset contact and mount VAF-1 to the console
10. Test correct function of new handset.

*The sparepart set is complete with holder, replace handset only.*
