zenitel
because communication is critical

ZENITEL INTELLIGENT COMMUNICATIONS UNIFIED WITH THE LENELS2™ ONGUARD® ACCESS CONTROL SYSTEM

- Automates processes by linking common security events through the LenelS2 OnGuard platform.

- Simultaneous live audio, video, and alarm monitoring gives full situational awareness for better decision making and faster response.

- Exceptional intelligibility means users can hear, be heard and be understood – every time.

- Continuing strategic business partnership between LenelS2 and Zenitel provides seamless updates, Tier 1 tech support, and the LenelS2 Value-Added Reseller (VAR) purchasing channel.

zenitel **INTEGRATES**

WHAT IS POSSIBLE WITH A UNIFIED SYSTEM?

Intelligent Communication is driven by Intelligent Integration. Audio becomes intelligent by seamlessly integrating it into the core business and security applications within the organization. The integration possibilities are endless.

LenelS2 is a worldwide provider of open-platform security solutions with integrated access control and video management.

KEEP A 360-DEGREE VIEW

Link access, video, and communication events in the OnGuard platform to improve situational awareness.

VERIFY VISUAL IDENTITY

Enable dual verification of identity through video and audio communication.

SUPERVISE AND MONITOR

See and verify the status of each device in the System Status tree and and the OnGuard Maps feature.

MAP CALL SOURCE

Easily identify where calls originate in the OnGuard Maps feature.

IC-EDGE

ICX-AlphaCom

LENEL:S2

NOTIFY ACROSS SYSTEMS

Broadcast live or custom pre-recorded voice messages across all audio systems, or trigger automatically on alarm or status change.

LOG COMMUNICATION EVENTS

OnGuard Events Report feature provides a record of all communications events, for business optimization and liability protection.

CLICK TO CALL

Initiate intercom calls to any device from the System Status tree and the OnGuard Maps feature.

ONGUARD OPTIONS:

Interoperability between all Zenitel and OnGuard platforms create a scalable solution from simple to enterprise.

ONGUARD SYSTEM

An open access control platform with a level of integration that allows you to select hardware and software components that best fit your needs.

ONGUARD ENTERPRISE

A synchronized database, multi-server access control system, ideal for enterprises spread across multiple geographies.

ADVANTAGES OF ENTERPRISE SECURITY MANAGEMENT:

- Customizable integrated functionality allows you to adapt your systems to your unique processes and procedures.
- Interoperability embeds audio within your critical security processes avoiding the inefficiencies of standalone systems.
- On certain events in connected OnGuard systems (e.g., video, access control, intrusion detection) it is possible to initiate a preprogrammed script that executes any function ICX-AlphaCom supports, including:
  - Voice message to a single station
  - Voice message to a group
  - Initiate a conference call between operators
  - Initiate pre-recorded messages on alarm/event

WHY ZENITEL?

Communication is critical in all areas of business; therefore, our expertise is focused on providing intelligent communication solutions that allow you to hear, be heard and be understood, every time. Zenitel systems interface with other security systems including CCTV, access control and alarm for a comprehensive security solution. Our primary system offering is within Public Address, Intercom and Radio. Our key markets include: Building Security, Public Safety/Smart Cities, Transportation, Education, Prisons, Industrial Manufacturing, Healthcare, Retail, Energy and Maritime. Zenitel systems provide high availability, scalability, reliability, maintainability and cyber defensibility. By reducing hardware to a minimum, and keeping the benefits of centralized server management, organizations have more flexibility in scale and performance.
