

Hear, be heard and be understood – every time and everywhere!

ICX-AlphaCom

zenitel

because communication is critical

Have communication challenges?

The ability to communicate clearly is important to just about any situation. But many settings pose challenges to clear communication, ranging from loud background noise to the environmentally demanding conditions of industrial and offshore

locations. ICX-AlphaCom, together with connected Vingtor-Stentofon devices, is able to provide crystal-clear communication in any environment and circumstance.

Opens a Path to the Future

The next-generation intelligent communication system that delivers unrivaled sound quality, interoperability, security and ease of use and lets your communication possibilities grow over time.

AUDIO QUALITY

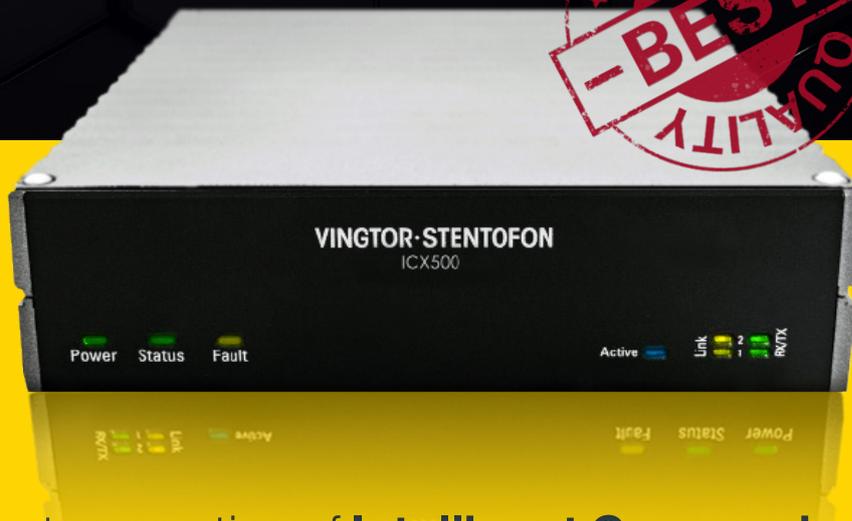

Your ability to hear, be heard and be understood in any situation is essential. ICX-AlphaCom systems are used in the world's most demanding and challenging environments. And they connect to devices that deliver unrivaled sound and audio quality.

INTEROPERABILITY

ICX-AlphaCom offers seamless integration with leading risk, resilience and security solutions by adopting open standards.

SCALABILITY

Your communication needs can change and grow over time. ICX-AlphaCom is a flexible system to which more functionality can always be added.

“The next generation of **Intelligent Communication** systems delivers unrivaled levels of operational efficiency, security and ease of use”

ICX-AlphaCom and Cybersecurity

ICX-AlphaCom is designed with cybersecurity in mind. The system includes:

- Network separation
- Support of 802.1x with radius accounting
- NTP support for accurate timestamps on logs
- SNMP support

Using these and other tools, you can easily implement all of the important CIS-controls as described in Zenitel's Cybersecurity Hardening Guide

Keeping
your system
safe and
operational

Extensive Feature set

ICX-AlphaCom supports an extensive feature set, specifically developed to meet demanding customer requirements across all market segments targeted by the unit.

CUSTOMIZATION

ICX-AlphaCom is an intercom exchange which enables uni- and bi-directional speech.

But in order to be able to meet as many customer requirements as possible when it comes to special features, an Event Handler has been implemented.

This way, functionality can be implemented which cannot be captured in a standard feature set. The event handler is unique in the world of intercoms. It is what gives the exchange its flexibility and makes it possible to meet just about any customer requirement.

Because your safety is important

SECURITY – AT THE CORE OF ALL WE DO

Personal security, cybersercurity:
Security in every sense.
