BUILDING SECURITY & PUBLIC SAFETY: IP INTERCOM SOLUTIONS FOR RETAILS

DELIVER A HIGH-QUALITY AND EFFICIENT CUSTOMER EXPERIENCE

Instant voice communication is the key to delivering a quality customer experience by enabling self-service solutions and quicker response to situations.

Plus, it increases worker and customer safety. When you add our IP intercom solutions and speakers to your facilities, it enhances security measures such as CCTV and access control systems by adding the ability to speak and listen.

HD VOICE IP66 SIP PoE 10W CCoIP®

BECAUSE

when communication is critical

VINGTOR  STENTOFON

APPLICATIONS AND BENEFITS

REMOTE CONTROL ROOM

Seamless integration with radio, management system, CCTV, access control and video management systems

PERIMETER CONTROL

Triggered audio alerts through CCTV motion detection or camera preset positioning through audio surveillance

INFORMATION POINTS

Intercoms placed throughout the store and parking lots to assist customers.

HIGH-VALUE SECTIONS

Control access into high-value sections in the store, using our stations for identification and recording.

PUBLIC ADDRESS

Broadcast live or prerecorded messages throughout the premises, for example to announce the store is closing soon or in cases of emergency.

WAREHOUSE & STORAGE

Pre-recorded announcements, station-to-station calls & group call announcements

BARRIERS AND LOADING DOCKS

Control trucks entering the premises and assist drivers.

CLICK & COLLECT

Assist customers at click and collect points

OFFICES

Enable communication between office and staff with station-to-station calls, DECT phones and radio

ROAMING GUARDS AND STAFF

Our intercoms can seamlessly integrate with radio, wireless phones, and other communication devices used by guards and staff.

OUR SUGGESTIONS:

ICX-ALPHACOM PLATFORM

Our ICX-Alphacom platform is a communication system that allows you to record audio and connect devices and systems at unrivaled levels of manageability, scalability, robustness and interoperability. It integrates seamlessly with market leading access control, video management and unified security systems.

CONTROL ROOM MASTER

Our control room master station features large high-contrast display, dynamic navigation keys and options for goose-neck microphone, handset and DAK key units.

TURBINE IP & SIP INTERCOMS

Our Turbine IP Intercom Stations are designed to withstand treacherous situations including extreme fluctuations in temperature, vandalism, noisy, dirty, and dusty environments. The series offer unrivaled sound quality, security and ease of use, with multiple design options. Perfect for doors, loading docks, and information points.

TURBINE MINI IP INTERCOM

Our Turbine Mini IP intercom stations are robust, designed for indoor use, typically as a communication, information or emergency point.

IP LOUDSPEAKER

Our IP Speakers features a 10W Class D amplifier, utilizing all the power that PoE can deliver – more than 116dB, depending on the signal input. With IP, the system is able to monitor and address each speaker individually. With the amplifier in the speaker itself, the need for a central amplifier unit with conventional speaker loops is eliminated, making the system highly scalable, and additional speakers can be added easily.

WHY VINGTOR-STENTOFON?

The Vingtor-Stentofon critical communication portfolio offers state of the art quality audio software and hardware. Just press a button and you can call for immediate assistance, help and support. The voice on the end can be heard loud and clear, thus eliminating misunderstandings or misinterpretations. Even in

very noisy environments we offer crystal clear audio - driven by our Turbine stations with 10 Watt amplifiers and active noise cancellation software included. Our quality products are built to last with backwards compatibility; this reduces the cost of ownership.
